

PRESS RELEASE

eQsolaris Accepted as a Semi-Finalist for Cleantech Open

June 15th 2010: eQsolaris, a Delaware C Corporation, is excited to announce that the company has been selected as a semifinalist in the 2010 Cleantech Open. The company will be attending a range of events as well as presenting eQarray™ to potential customers and investors. The company will also be presenting in front of a panel of judges who will be determining whether the company qualifies for a chance to win a portion of a \$1 million prize, more importantly the opportunity to present to a large audience of both the public and the press.

eQsolaris is a synergistic company that was founded by Kyosemi Corporation, a Japanese optoelectric and solar energy company; Energy Related Devices, a Los Alamos, New Mexico energy research and technology development firm; and Mihama Group, a Japanese chemical and materials company. Together these companies contribute 2 world- wide patent applications, scientific intellectual resources, capital, and distribution. eQsolaris is a company focused on creating solutions for everyday energy problems with everyday technologies with a bit of innovation. Founded in 2007, the theme of the company remains; *The power of power*, as the company develops more cost effective solar energy systems those systems will deliver exponentially greater benefits.
